RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
P. O. Box 1450
Alexandria, VA 22313-1450

Sir:

This paper is in response to the restriction requirement in the Office Action mailed June 4, 2003, this response being timely filed July 7, 2003, on the next business day following a Federal Holiday July 4, 2003 and weekend.

REMARKS

In the Office Action mailed June 4, 2003, the Examiner subjected the claims of the present application to a restriction requirement. More specifically, the Examiner alleges that there are four distinct inventions: Group I (claims 1-14) drawn to a method of making a micromachined component, classified in class 216, subclass 095; Group II (claim 15) drawn to the product made by the Group I process, classified in class 428, subclass 523; Group III (claims 16-24) drawn to a method of making a micromachined component, classified in class 216, subclass 095; and Group IV (claim 25) drawn to the product made by the Group III process, classified in class 428, subclass 523. The Examiner states that election of one Group over the others is required because the inventions are distinct.
